PROFESSIONAL SUMMARY

Embedded Software Engineer with 2.5+ years of experience building real-time **automotive systems** using **C/C++**, specializing in **camera pipelines**, **performance optimization**, and **low-level debugging** on **QNX-based systems**. Experienced in designing **modular, platform agnostic architectures** and debugging complex system-level issues. Additional experience in backend and **full-stack development** with a focus on scalable, production-ready systems.

WORK EXPERIENCE

Software Engineer, ABC Technologies, Bengaluru

April 2025 – Present

- Developed **real-time camera pipeline** and **ADAS** related features for BMW systems on **QNX-based HLOS**.
- Optimized **C/C++** modules to reduce **latency** and **memory footprint** in **performance-critical embedded environments**.
- Built and deployed applications on **QNX**, handling **cross-compilation** and integration with **system-level services**.

Associate Software Engineer, ABC Technologies, Bengaluru

April 2024 – April 2025

- Delivered **production-grade camera features** under strict latency and reliability constraints in **embedded systems**.
- Enhanced **CI/CD pipelines** with automated validation, improving release quality, and reducing regression.
- Diagnosed and resolved cross-module system issues in complex embedded workflows.

Trainee Engineer, ABC Technologies, Bengaluru

October 2023 – April 2024

- Strengthened fundamentals in **C/C++**, **memory management**, **debugging**, and **performance optimization**.
- Worked in **Agile** teams using **Git** workflows and industry-standard development practices.

Full Stack Developer (Intern), XYZ Company, Shimla, HP

July 2023 – September 2023

- Developed an end-to-end **web application** using **Django** and **MySQL** with secure authentication and role-based access control.
- Designed scalable backend logic and implemented **admin-driven workflows**.

Web Developer (Intern), XYZ Company, Shimla, HP

July 2021 – August 2021

- Contributed to **HimSabe**, a real-time vehicle tracking system with responsive UI and backend integration.
- Integrated frontend with **Spring Boot** services and **MySQL** for seamless data flow.

SKILLS

Programming Languages: C, C++, Python, Java, JavaScript, SQL

Embedded & Automotive: QNX, Linux, Embedded Systems, Automotive Software, ADAS, AUTOSAR, Camera Systems, IPC, Multithreading, Memory Management, Performance Optimization, Debugging, Cross Compilation, Real-Time Systems

Software Engineering: Data Structures, Algorithms, Low-Level Design, Design Patterns, OOPs, Git, CI/CD, Agile Development

Backend & Full Stack: Django, Flask, FastAPI, Spring Boot, React, Node.js, REST APIs, MySQL, PostgreSQL

AI & Automation: OpenAI API, Hugging Face, LLM Fine-Tuning, Selenium, Playwright, FFmpeg, NumPy, Pandas

EDUCATION

Bachelor of Computer Science with Information Security (Hons.) | ABC University | 2019 – 2023

PERSONAL PROJECTS

Desktop Activity Tracker (Python, OpenAI API, Cryptography, SQLite)

- Built a **Windows-based** tracker with **encrypted local storage** and low runtime overhead.
- Processed user activity data and generated **AI-based daily summaries** using **OpenAI API**.

Conversational AI using Fine-tuned DialoGPT (Python, DialoGPT, LLM Fine-Tuning, Hugging Face Transformers)

- Fine-tuned **DialoGPT** on a custom dataset, handling **data preprocessing**, **tokenization**, and **training**.
- Improved response relevance and contextual understanding through model tuning.

Automated Content Generator (Python, Selenium, API – Streamlabs | Instagrapi, FFmpeg)

- Built an end-to-end automation pipeline for **content scraping**, **TTS**, **video generation**, and **publishing**.
- Integrated multiple APIs and tools to create a **modular and scalable workflow**.

Content Management System (Python, Django, HTML, CSS, MySQL)

- Developed a full-featured secure **CMS** with **role-based authentication** and **content publishing workflows**.
- Designed scalable backend architecture and responsive frontend.
